Committed to building Qatar

Dear Team,

It gives me an immense gratification to announce commencing with SAP ERP implementation in our corporate. This will be a worthwhile breakthrough into our business transformation and evolvement. I'd like to articulate that information technology is not only the choice of development strategy, but also enhance the corporate governance standards, it is important means to win customers, enhance the current processes and procedures by reengineering the corporate's respective process and policies through adhering to SAP benchmarks. We must be forward-looking to upgrade and improve our operational management level, and to promote the implementation of SAP and the systems around it. SAP project' success is of great strategic significance to the corporate, and I'm relying on your enthusiasm and professionalism in delivering this project in a professional and most profound manner

Abdulla Bin Nasser Al Misnad

QIG & Fujitsu signing SAP implementation 's contract

We have chosen Fujitsu Consulting for this project based on their rich international experience and proven expertise. They have shown great interest to be our partner in delivering this complex implementation in a rational approach, said by "Mr. Tamer Amin, QIG IT director & SAP project manager"

Chairman's message

H.E. Mr. Abdulla Bin Nasser Al Misnad

Chairman & Managing director

The magic word of Integration

Well Integrated organization would demonstrate unification across people, process and systems. Information technology plays a key role in organizational integration in the knowledge era. Common IT practices on communication, productivity & security have made diverse business talk coverage into a common language and assimilate changes quicker than in industrial era. Productivity tools such as ERP, emails, office

apps have been in the forefront of organizational integration in knowledge. SAP provides a platform for convergence and diversity at the same time. While backend functions are integrated to provide on organization view, the system provides flexibility to run business operations as per nature of business
