Learning SAPanese – Lesson 2

FICO Module

It includes two major functionality - (FI) Financials & (CO) Controlling .

SAP Finance Module (FI) :Includes Account Payable , Accounts Receivable , Bank Accounting , Funds management , Fixed Asset Accounting and General Ledger Accounting . Also Procedures to post accounts , close books and prepare financial statements (profit / loss and Balance Sheet) .

SAP Controlling Module (CO) : represents the corporate’s flow of cost & revenue. It allows you to manage internal cost management accounting including : Cost elements , cost centers , Profit Centers , Internal Orders, profitability accounting and Product Costing .

SD Module

SAP SD handles Sales Activities & the distribution. The main activities are the sales planning & forecasting ,sales order handling & the Distribution of shipments to customers. Also the billing process, customer invoice, delivery & risk management

What SAP stands for ?

SAP started in 1972 by five former IBM employees in Mannheim Germany as System analyse und program Mentwicklung (“ System Analysis & Program Development”). And later it changed to stand for Systeme , Anwendungen & Produkte (“ System Applications & Products”). SAP R/3 was officially launched on 6 July 1992 .It was renamed (ECC) Enterprise Core Component . The newest version of the Suite is SAP ECC 6.0 which we are in QIG working on it now.
